PROFILE SUMMARY

- Full-stack developer with a strong focus on front-end technologies and expertise in **React**.js, creating s calable web applications.Collaborated with a team of 5+ developers, showcasing strong communication skills to implement features that engaged users.
- Skilled in optimizing web applications for performance and responsiveness, with a focus on user-centric features.
- Expertise in **React**.js, **Node.js** and using **MongoDB** to deliver high-quality projects on time.

TECHNICAL SKILLS

- HTML
- CSS
- JavaScript
- REACT.JS
- C programming
- C++
- JAVA
- DSA
- OOPs
- Tailwind
- Node.js
- Mongodb

WORK EXPERIENCE

Internship shala– Web Developer
May 2024 – Aug 2024

- Led **front-end development** using HTML, CSS, and JavaScript, improving website performance by 30%.
- Collaborated with a team of 5+ developers, showcasing strong communication skills to implement features that engaged users.
- Optimized JavaScript code, reducing server load by 20%, demonstrating problem-solving and technical troubleshooting abilities.
- Focused on front-end optimization with **responsive design**, improving user interaction, and reducing bounce rate by 15%.

EDUCATION

Master Of Computer Application 2022 – 2024

R.D. Engineering College

Bachelor Of Computer Application 2019 – 2022

Institute of Management and Research

PROJECTS

Language-translator **(click here)**

Tech Stack: HTML, CSS, JavaScript , RESTful API

OVERVIEW

This is a simple language translator web application built using pure HTML, CSS, and JavaScript. The project utilizes the Google Translate API to provide translation services, allowing users to translate text from one language to another seamlessly. The application is designed to be fully responsive, providing an optimal user experience across various devices and screen sizes.

FEATURE

- Translate text between multiple languages using the power of Google Translate API.
- Simple and intuitive user interface for easy navigation and usage.
- Fully responsive design ensures compatibility with desktop, tablet, and mobile devices.
- Supports a wide range of languages, enabling users to translate to and from different language pairs.
- Minimalistic and lightweight, ensuring fast loading times and smooth performance.

WEATHER-APP **(click here)**

Tech Stack: HTML, CSS, JavaScript, RESTful API

OVERVIEW

I developed a weather application using HTML, CSS & JavaScript, integrated with a weather API. The app provides users with accurate and real-time weather updates for any location. It features a sleek and responsive design, ensuring compatibility across devices. The application fetches data from the API, including temperature, humidity, wind speed, and weather conditions, and presents it in a user-friendly interface.

FEATURE

- Real-time weather updates for any location using API integration.
- Responsive and visually appealing UI with Inky, HTML, and CSS.
- Detailed weather information, including temperature, humidity, and wind speed.
- Search functionality for easy location-based weather tracking.
- Cross-device compatibility for seamless use on phones, tablets, and desktops.
